Engineering

2020-2024

EXPERTISE

Website Developer

Mobile App Developer

Cloud Azure

GOAL

Ethical Hacking

Project

- June-2023
During 5-6th sem of Eng.

AI Virtual Paint

This project presents a real time video based pointing method which allows sketching and writing of English text over air in front of camera. Proposed method track the colored finger tip in the video frames and Here Color Detection and tracking is used in order to achieve the objective. The color marker is detected and a mask is produced. It includes the further steps of morphological operations on the mask produced which are Erosion and Dilation. Erosion reduces the impurities present in the mask and dilation further restores the eroded main mask.

Internship

- July-2023
During 6th sem Summer Internship

When I was doing that summer internship of a month, I learnt many new and unique tricks about my personal skill. That skill I used in my professional life. I did my summer internship from codesoft. The company who has brilliant innovative ideas and tasks for the interns to expand their skill and able to get high paid job in future. I definitely will share my experience to my friends and classmates. And last but not least I would like to thank to the codesoft team.

Specific Subjects

- 2020-2024
Bachelor of Computer Engineering

I learnt various subjects in my Bachelor degree which are specific relative to the computer engineering. Among them cloud Azure in MICROSOFT, Data Visualization and Mobile App Development are my favourite. I was quite expert in these particular subjects. Artificial Intelligence also one of my favourite subjects.
